

Midwest GeoDrill

Drilling Specialists

Geothermal Drilling

Drilling Specialist with a wide range of experience and expertise on staff to take on any project. Based out of West Michigan, Midwest GeoDrill has been drilling for over ten years, completing 3.7 million vertical feet of drilling. We own and operate all of our rigs and support equipment. The management/ownership are all active employees of the company. Our service team has grown to 34 full-time employees including 9 experienced drillers. We have the capabilities to drill; Geothermal, Cathodic, Caisson, Geotechnical, and all forms of water well from a large capacity production to residential. Our skilled team has a proven track record of completing complex projects that were previously deemed impossible to finish.

Services & Qualifications	
Drilling Methods	Midwest GeoDrill is capable of many different drilling methods including Mud Rotary, Air Rotary, Hammer Drilling, Cable Tool, & Specialty Methods. These methods allow our team to be successful in varying types of geologies around the state. We staff a full-time oil field mud engineer.
Availability	Midwest GeoDrill owns & operates four, V140 Rotary Drilling Rigs all less than five years old. We are capable of drilling within 72 hours after the contract is signed & release of permit.
Drilling Fluids Management Program. Minimal Site Impact	Midwest GeoDrill utilizes the latest in site management technology. Our Drilling fluid system "The Mud Manager" eliminates the need for a mud pan. Once the hole is finished our vac trailer can remove the drilling mud from the site.
Borehole Construction Technical Service Team	Midwest GeoDrill staff's technical experts in geology, drilling, mud engineering, solids control, flow control and cementing. Our technical service team can manage all borehole construction needs.
Customer Expectations	Midwest GeoDrill's borehole design process will educate the customer on the construction timeline, drilling conditions, and any downhole issues. We are the technical drilling experts and can handle any downhole problem.
