

Industrial Drilling Applications

Drilling Specialist with a wide range of experience and expertise on staff to take on any project. Based out of West Michigan, Midwest GeoDrill has been drilling for over ten years, completing 3.7 million vertical feet of drilling. We own and operate all of our rigs and support equipment. The management/ownership are all active employees of the company. Our service team has grown to 34 full-time employees including 9 experienced drillers. We have the capabilities to drill; Geothermal, Cathodic, Caisson, Geotechnical, Dewatering and all forms of Water Well from a large capacity production to residential. Our skilled team has a proven track record or completing complex projects that were previously deemed impossible to finish.

Services	s & Qualifications
Drilling Methods	Midwest GeoDrill is capable of many different drilling methods including Mud Rotary, Air Rotary, Hammer Drilling, Cable Tool, & Specialty Methods. These methods allow our team to be successful in varying types of geologies around the state. We staff a full-time oil field mud engineer.
Availability	Midwest GeoDrill owns & operates four, V140 Rotary Drilling Rigs all less than five years old. We are capable of drilling within 72 hours after the contract is signed.
Drilling Fluids Management Program. Minimal Site Impact	Midwest GeoDrill utilizes a drilling fluids management program to maintain clean drilling fluids and a clean job site. Our Drilling fluid system "The Mud Manager" removes drill solids from the drilling fluid leaving semi-dry solids easily disposed. We maintain a clean and safe job site.
Borehole Construction Technical Service Team	Midwest GeoDrill staff's technical experts in geology, drilling, mud engineering, solids control, flow control and cementing. Our technical service team can manage all borehole construction needs.
Customer Expectations	Midwest GeoDrill's borehole design process will educate the customer on the construction timeline, drilling conditions, and any downhole issues. We are the drilling experts that can handle any downhole problem.
